

MARK EMAD SIDHOM

Mobile Application Developer | Flutter & Dart

+20 120 467 1792 | markemad74@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Mobile Application Developer with 1+ years of hands-on experience building and shipping cross-platform apps using Flutter and Dart, including commercial products such as an Android TV digital-signage system and a smart pharmacy inventory tool. Comfortable owning features end-to-end — from UI implementation to REST API integration and local persistence. Currently expanding into native Android development with Kotlin and Jetpack Compose, with a strong interest in clean architecture and scalable app design.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, Android SDK | Currently learning: Kotlin, Jetpack Compose

Architecture & State Management: BLoC, Provider, GetX, MVVM, Clean Architecture

Networking & Data: REST APIs, Dio, Retrofit, Firebase, Hive, Room, SharedPreferences

Tools: Android Studio, VS Code, Postman, Git/GitHub, Figma (basic)

Practices: Problem Solving, Debugging, API Integration, OOP, Error Handling

EXPERIENCE

Mobile Application Developer Trainee — DEBI | Nov 2025 – Aug 2026 (Expected)

- Completing a professional training program covering software engineering, mobile app architecture, Git/GitHub workflows, UI/UX principles, and collaborative development practices.

Cravio.ai — Online Ordering System | Flutter Developer, Startup | Feb 2025 – Oct 2025

[cravio.ai](#)

- Redesigned multiple UI screens across the customer and restaurant apps, improving visual consistency and overall UX.
- Built a background thermal-printing feature that auto-prints order receipts on arrival, removing the need for manual staff intervention.
- Delivered several functional enhancements tailored to each app's workflow.

Tech: Flutter, Dart, REST API integration, Dio, GetX

RX-Medecia — Smart Pharmacy Inventory System | Flutter Developer | Aug 2024 – Jun 2025

[GitHub Repo](#)

- Developed an intelligent inventory app for pharmacists to manage stock by active ingredient and dispense medication against prescriptions.
- Designed data models linking patient records, prescribed active ingredients, symptoms, and dispensed drugs for accurate tracking.

Tech: Flutter, Dart, BLoC, REST API integration, Dio, SharedPreferences

Diggitsy — Digital Signage for Android TV | Flutter Developer, Freelance | 2024

[diggitsy.com](#) | [GitHub Repo](#)

- Built a Flutter-based digital signage app for Android TV devices that connects securely to a cloud backend.
- Implemented device-based content delivery, displaying dynamic content tied to a unique device identifier.

Tech: Flutter, Dart, REST API integration, Dio, SharedPreferences

EDUCATION

B.Sc. in Computer Science | Sep 2021 – Sep 2025

El Shorouk Academy — Faculty of Computer and Information Technology

Grade: Very Good
